

Recommended qualities for workgroup members:

The expectation for workgroup members is broad multidimensional representation for the service population and the essential services.

- Time commitment - volunteers would need to be able to commit to meeting about twice a month for one year
- Statewide representation – both county population and distance from metro
- Range of interest/service representation - the essential service areas/population served by non-profits, advocates should be fully represented
- Program knowledge – likely mid-management level; person actively involved in management of programs
